

Why Analytics Squad?

Boost internal expertise

Alongside helping you achieve better outcomes fast, we focus on improving your internal capabilities and processes so your organisation can continue to build its data and analytics foundations.

Scale with requirements

Following agile methodologies, the Analytics Squad works with your team on a weekly basis, scaling up or down as your project advances.

A team of experts

Take your pick from our team of leading New Zealand data and analytics experts including Data Analysts, Storytellers, Engineers, Data Scientists and Architects.

What could the Analytics Squad help you achieve?

No matter how big or small the project, which skills you seek, or how long you need us for, the Qrious Analytics Squad can help. We'll work with you to turn your data into actionable insights, so you can make better business decisions.

Organisational transparency

Identify those processes or projects that aren't delivering ROI or take up too much resource so you can take remedial action fast.

Decision support

Implement churn models, predictive models or real-time decision engines to empower your team to make the best decisions based on your data.

Situational intelligence

Develop reporting dashboards or analytical models that reveal insights into performance, identifies risk, or determines the next step your organisation could make.

Commercial optimisation

Bringing together your various data sets, we can help you implement predictive models and decision engines that help refine your business model and optimise your products, services or offers.

Why Qrious?

Qrious has worked alongside leading New Zealand organisations and Government agencies on a range of specialist analytics projects. Our expert team of analytics and data professionals possess hard-to-find skills and knowledge across Data Consulting, Data Science, Data Architecture and Data Engineering disciplines.
