Strategic Consulting

Access expert consultants from Qrious to help accelerate business outcomes.

Whether for a short-term or a large-scale project, augment your team with specialist skills from Qrious. Our experts can help deliver quality data and analytics outcomes to your organisation.

Strategic Consulting offers full-time dedicated resource to supplement your team, without ongoing commitment. If you need to fill a short-term skills gap or have a high priority project that requires more hands-on-deck, Qrious has consultants who can help.

Our consultants come from a range of specialist backgrounds across the data and analytics spectrum. So, no matter what your requirements are, we'll be able to source the right person for you.

Why Strategic Consulting?

Access hard to find skills

Data and analytics specialists are in high demand in New Zealand. So, they can be difficult to recruit for short-term or one-off projects. With Strategic Consulting, gain access to the skills you need, when and for how long you need them.

Skip recruitment

Recruiting staff can be expensive and time consuming. Instead of spending hours wading through CVs, talk to us about your requirements and we will source the right person for the job. And they're yours for as long as you need them.

Sophisticated data projects

Our team of specialists have proven experience across the analytics spectrum. From data segmentation, visualisation and reporting dashboards, to decision engines, predictive modelling, machine learning and AI.

How can Strategic Consulting help you?

Strategic Consulting gives your team access to hard-to-find specialists spanning data and analytics disciplines. Easily complete sophisticated projects in your organisation with the help of our expert consultants.

Data Engineers

Our engineering team deploy and manage infrastructure, integrating data from various sources into robust and secure environments. Through their expertise they provide optimised solutions that are scalable for our customers analytics requirements.

Business Intelligence Consultants

Our Business Intelligence Consultants work with best of breed technologies, providing expertise in the design, development, and implementation of Business Intelligence (BI) and analytics systems.

Data Scientists

Our Data Scientists apply analysis techniques to seek insights and build models for deployment. They can discover value hidden in vast amounts of data by applying data mining techniques, doing statistical analysis, and building high quality prediction systems.

Data Story Tellers

Our Data Story Tellers build a narrative from the results of data analysis. They also explore how best to provide an interface for analytics to a business, whether a customisable dashboard, natural language processing such as chat bots, or reports and alerts.

Why Qrious?

Qrious works alongside leading New Zealand brands, enterprises and government agencies. Our expert team of analytics and data professionals have hard-to-find skills and knowledge across Data Consulting, Data Science, Data Architecture and Data Engineering disciplines.
